SUMMARY

As an undergraduate student, I bring a dedicated approach to software development, bolstered by proficiency in essential programming languages including Java and Python. Throughout my academic journey, I've honed my ability to efficiently manage tasks and navigate demanding environments. I am enthusiastic about applying my theoretical knowledge and practical skills to real-world software project.

EDUCATION

B V Raju Institute Of Technology <i>B.Tech in Computer Science Engineering, GPA: 9.10</i>	Narsapur, Telangana 2022 - 2026
Narayana Junior College <i>Intermediate in MPC, Percentage: 98.7</i>	Kukatpally, Telangana 2020 - 2022
Bhashyam High School <i>Class 10th, GPA: 10.0</i>	Kukatpally, Telangana 2019 - 2020

SKILLS

- Programming Languages:- Java | Python
- DSA concepts
- Soft Skills: NPTEL Elite Certification in Java, conducted by Kharagpur
- CISCO Certification in Programming Essentials in Python
- CISCO Certification in Programming essentials in C++
- Proficient at an intermediate level in Core Subjects which includes Operating Systems, Computer Networks, Cloud Computing, Machine Learning Techniques.

ACHIEVEMENTS

- Submitted research paper at the IEEE 2nd DHIHER International Conference on Healthcare and Education, showcasing innovative approaches to mobile security.
- Secured second place in a college treasure hunt competition, completing puzzles and coding challenges as part of a four-member team.
- Collaborated as a team in the Promethan competition, successfully tackling coding challenges and enhancing problem-solving skills.
- Participated in a 5K run competition, finishing in the top 10, supporting fundraising efforts for local government colleges and schools.

POSITIONS OF RESPONSIBILITY

- Led a project team in the development of an AI-based malware detection system, coordinating tasks, managing timelines, and ensuring successful project delivery.
- Promoted an event and managed to get 50+ registrations.
- Created a poster for the event, using Canva.

PROJECT

AI VIGILANCE: PIONEERING MALWARE DETECTION IN ANDROID REALM

- Developed and implemented AI algorithms for malware detection in Android, significantly improving threat identification.
- Automated the malware detection using Python, streamlining the analysis and response to threats in real time.
